

Version 1.3.4.3

Bug fixes:

Bug fix for combobox. When content is variable, the content was not updated correctly.

Version 1.3.3.11

New features:

Added logger for easy debugging

Added option to use the URCap for free for iSee Ui files that consist of max 8 items.

Changed that DataStorage files, used by items of type List, are now stored in the hidden iSee Ui folder instead of programs folder. This to avoid situations where operator deletes this file.

Bug fixes

Solved bug that iSee Ui panel is not updating if opened using the toolbar. This problem did not occur when the panel was opened using the iSee Ui program node "iSee Ui: Open".

Version 1.3.2.66

New features:

Bug fixes

Solved problem of XMLRPC error if too many calls to the XMLRPC server are done at the same time.

Version 1.3.2.65

New features:

License file and .isui files are now stored in hidden folder in "programs" directory. License fill will still be stored also on separate location

License file backup implemented for if new image is installed (backup from license file in programs folder) or programs folder is cleared (backup from license file in separate location).

Bug fixes

Solved error if program is loaded that uses an .isui file which hasn't been loaded yet in the installation

Version 1.3.2.32

New features:

Added progress bar for loading and activating new iSee Ui file

Bug fixes

Program node shows panels if node was still configured for old version with "URI" name

Version 1.3.1.92

New features:

Program nodes are no longer linked to activated .isui file.

Program nodes no longer need to be reconfigured on selection of new item type or name/id

Bug fixes

Version 1.3.0.46

New features:

Improved stopping of daemon process and communication with running daemon.

Changed "URI" name to "iSee Ui"

Bug fixes
